Start with Medicare basics

Know how Medicare works, then choose what works for you

Original Medicare is provided by the federal government. It offers coverage for:

Hospital stays and inpatient care.
This is called Part A

Doctor visits. This is called Part B –
you pay a monthly premium for it.

Original Medicare does NOT include prescription drug coverage

Prescription drug coverage. This is called Part D and is not included with Original Medicare. You are not required to enroll in a Part D plan when you first become eligible for Medicare. If you enroll in a Part D plan in the future, then you will pay a penalty equal to about 1% of the average monthly premium for each month you delayed enrollment. This must be paid monthly as long as you are enrolled in Part D.

Depending on your needs, you may want to add more coverage to Original Medicare

Additional coverage is offered by private insurance companies, such as UnitedHealthcare. You have a couple of different options to choose from:

Option 1: Enroll in a Medicare Advantage plan

Also called Part C

They combine Part A and Part B. Most Medicare Advantage plans also include Part D, so your hospital, medical and prescription drug insurance is all in one plan

Extras

Some plans may include extra benefits not included with Original Medicare

Option 2: Add one or both of these to Original Medicare

Medicare Supplement

Helps pay for some of the costs not covered by Original Medicare

Medicare Part D plan

Helps pay for prescription drugs and helps you avoid that 1% penalty

Use this book to get familiar with and enroll in a Part D plan. Speak with your agent if you are interested in a Medicare Supplement or Medicare Advantage plan.

Enroll in a Medicare Part D Prescription Drug plan (PDP)

Here's how this Medicare Part D plan works

What does it cover?

Original Medicare (Parts A and B) does not include prescription drug coverage. Medicare Part D plans cover certain prescription drugs. When comparing Medicare Part D coverage, check each plan's formulary (drug list) to make sure your drugs are included.

- ☐ The federal government sets guidelines for the types of drugs Medicare Part D plans must cover
- ☐ Each Medicare Part D plan decides which specific drugs it will cover and what members will pay
- ☐ Medicare Part D plans are available to those eligible for Medicare
- ☐ If you choose to enroll in a Part D plan, you can only do so through a private insurance company like UnitedHealthcare or other companies contracted with Medicare

When to enroll in a Medicare Part D plan.

Your Initial Enrollment Period (IEP) is 7 months long. It includes your birthday month, plus the 3 months before and the 3 months after your birthday month. Your IEP begins and ends one month earlier if your birthday is on the first of the month.

If you have creditable drug coverage through your employer or other insurance, you don't need to enroll in a Part D plan right away. Creditable drug coverage is coverage at least as good as you could get through Medicare Part D. You have a two-month Special Election Period to enroll in a Medicare Part D plan after losing other coverage. You could be charged a penalty if you go without creditable drug coverage over 63 days. The annual open enrollment period is from Oct. 15 to Dec. 7 when you can join a drug plan for the first time if you missed your deadlines for your IEP or a SEP, or switch from original Medicare to a Medicare Advantage plan, from one Medicare Advantage plan to another, or from one Part D drug plan to another.

There's a Medicare Part D Late Enrollment Penalty

Although you are not required to enroll in Part D, there is a penalty of 1% of the average monthly premium for each month you delay enrollment. This must be paid monthly as long as you are enrolled in Part D.

Are you eligible to enroll in this plan?

You are eligible for a Medicare Part D plan if:

✓ You are enrolled in Original Medicare Parts A or B (or both) AND ✓ Live in the plan's service area

Considerations for selecting the Part D plan that's right for you

Does the plan cover my prescription drugs?

Enter your drugs into our online Drug Cost Estimator tool, [EstimateDrugCostsAARP.com](https://www.estimateDrugCostsAARP.com) to determine the total annual drug cost for each plan.

Which plan will be most cost effective?

When comparing plans be sure to consider all costs, including monthly premium, copays, deductibles and the tier your drugs fall into.

Are you willing to fill at a pharmacy in the plan's Preferred Pharmacy Network?

Using a preferred network pharmacy helps ensure that you get the lowest drug cost.

Medicare Part D and Medicare Supplement Insurance

Together, they offer more complete coverage than Medicare alone.

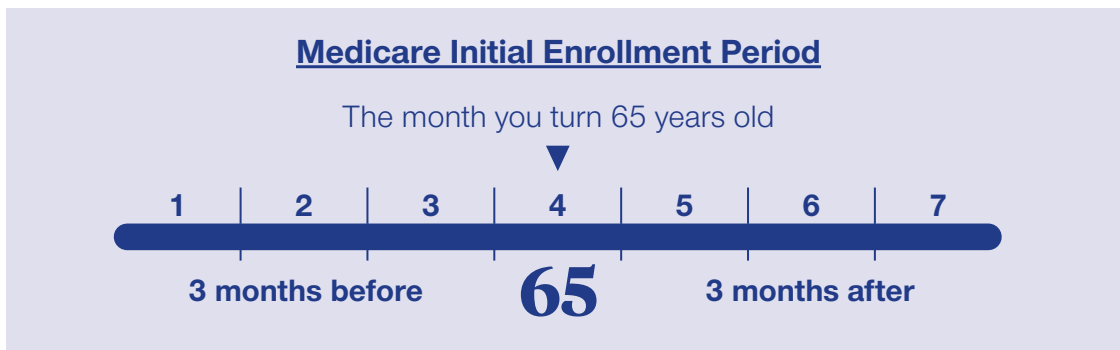

Original Medicare (Parts A and B) does not cover the cost of most prescription drugs or all of your medical expenses. Get more complete coverage by adding an **AARP® MedicareRx Part D Plan** and an **AARP® Medicare Supplement Insurance Plan**, both insured by **UnitedHealthcare Insurance Company (UnitedHealthcare)**.

Here’s how Part D works.

Part D prescription drug coverage is provided by UnitedHealthcare Insurance Company (UnitedHealthcare) and other Medicare-approved private insurance companies. If you have Original Medicare and would like to add prescription drug coverage, you can enroll in a stand-alone Part D plan.

When do I sign up for Part D?

You can sign up for a Part D plan during your Initial Enrollment Period after you have enrolled in Original Medicare. If you enroll in Part D after your Initial Enrollment Period ends, you may have to pay a late-enrollment penalty.

Are all Part D plans the same?

No. Private insurance companies each offer their own Part D plans, which cover different drugs and come with different costs. UnitedHealthcare offers a variety of AARP MedicareRx Part D plans, with benefits and features like **low monthly premiums, \$0 co-pays and \$0 deductibles**.

Insured through UnitedHealthcare Insurance Company

Here's how Part D works with Medicare supplement insurance.

Medicare supplement insurance plans help pay for some of the out-of-pocket costs not paid by Original Medicare. A Medicare Part D plan helps you pay for your prescription drugs. Together, Medicare supplement insurance and Part D provide you with more complete coverage than Original Medicare alone.

How do I know which coverage is the right choice for me?

UnitedHealthcare Insurance Company (UnitedHealthcare) can help you compare plans and get clear answers to your questions about both Part D and Medicare supplement insurance plans. And when you've found the plan that best meets your needs, we can help you apply right over the phone.

Your drug coverage

Make sure your drugs are covered

Review the Drug List (Formulary) in this Enrollment Guide to make sure your prescription drugs are covered by the plan. You should also review the Benefit Highlights in this guide for copays and supply amounts.

The amount you pay for covered drugs depends on these 4 things:

1. Drug tiers

Many plans group covered drugs into tiers. Generally, the lower the tier, the less you'll pay. All drugs in the Drug List are assigned to one of these tiers.

It's important to know not all generic drugs are lower cost. There are generic drugs in each tier. Be sure to check the Drug List to find out which tier your generic drug is in.

If your drug is in a higher, more expensive tier, ask your doctor if a lower cost alternative could work for you.

2. Where you fill your prescriptions

There are thousands of national and local pharmacies in our network. You'll pay the lowest cost for your prescription when you use a pharmacy in our preferred retail pharmacy network. Visit www.myAARPMedicare.com to find a location near you.

Simplify with prescriptions delivered to your door

You could save money on your 90-day supply of drugs with OptumRx, our preferred home delivery pharmacy.

OptumRx will send the prescriptions you take regularly right to your door with no cost for standard shipping. Save time by registering online at www.OptumRx.com to order new prescriptions, request refills and more.

3. Prescription drug payment stages

The amount you pay for prescription drugs may change during the year depending on which drug payment stage you’re in. Members move through the stages in the order below.

Annual Deductible	You’ll pay the full cost of your drugs until you meet the annual deductible amount. After you meet the deductible, your coverage moves to the Initial Coverage stage.
Initial Coverage	In this stage, you will pay a copay or coinsurance for your drugs until the total drug cost (the amount paid by you and your plan) reaches \$4,430.
Coverage Gap (Donut Hole)	After your total drug costs reach \$4,430, you will pay no more than 25% coinsurance for generic or brand name drugs, for any drug tier during the Coverage Gap.
Catastrophic Coverage	After your total out-of-pocket costs reach \$7,050, you will pay the greater of \$3.95 copay for generic (including brand drugs treated as generic), \$9.85 copay for all other drugs or 5% coinsurance.

4. Extra Help from Medicare

People with limited incomes may qualify for Extra Help to pay for their prescription drugs. If you qualify, Medicare could pay for some, or all of, your drug costs including premiums, deductibles and copays. Additionally, if you qualify, you won’t have a Coverage Gap or a late enrollment penalty. Many people qualify for these savings and don’t even know it.

For more information about Extra Help, contact your local Social Security office or call Social Security at **1-800-772-1213**. TTY users should call **1-800-325-0778**. You can also apply for Extra Help online at www.socialsecurity.gov/prescriptionhelp.

Other pharmacies are available in our network.

\$0 copay may be restricted to particular tiers, preferred medications, or home delivery prescriptions during the initial coverage phase and may not apply during the coverage gap or catastrophic coverage stage. OptumRx is an affiliate of UnitedHealthcare Insurance Company. You are not required to use OptumRx home delivery for a 90-day supply of your maintenance medication.

Member may use any pharmacy in the network but may not receive preferred retail pharmacy pricing. Pharmacies in the Preferred Retail Pharmacy Network may not be available in all areas.

Drug list

Drug list

This is a partial alphabetical list of prescription drugs covered by the AARP® MedicareRx Saver Plus (PDP) plan as of August 1, 2021. This list can change throughout the year. Call us at UnitedHealthcare or go online for the most complete, up-to-date information. Our phone number and website are listed on the back cover of this book.

- ☐ **Brand name** drugs are in **bold** type. Generic drugs are in plain type
- ☐ Your plan may have an annual prescription deductible
- ☐ Covered drugs are placed in tiers. Each tier has a different cost
 - Tier 1: Preferred generic
 - Tier 2: Generic
 - Tier 3: Preferred brand
 - Tier 4: Non-preferred drug
 - Tier 5: Specialty tier
- ☐ See the Summary of Benefits in this book to find out what you’ll pay for these drugs
- ☐ Some drugs have coverage requirements, such as Prior Authorization or Step Therapy

PA Prior authorization	The plan needs more information from your doctor to make sure the drug is being used correctly for a medical condition covered by Medicare. If you don’t get prior approval, it may not be covered.
QL Quantity limits	The plan only covers a certain amount of this drug for 1 copay. Limits help make sure the drug is used safely. If your doctor prescribes more than the limit, you or your doctor can ask the plan to cover the additional quantity.
ST Step therapy	You may need to try lower-cost drugs that treat the same condition before the plan will cover your drug. If you have tried other drugs or your doctor thinks they are not right for you, you or your doctor can ask the plan for coverage.
B/D Medicare Part B or Part D	Depending on how this drug is used, it may be covered by Medicare Part B or Part D. Your doctor may need to give the plan more information about how this drug will be used to make sure it’s covered correctly.
LA Limited access	The FDA only lets certain facilities or doctors give out this drug. It may require extra handling, doctor coordination or patient education.

MME Morphine milligram equivalent	Additional quantity limits may apply across all drugs in the opioid class used for the treatment of pain. This additional limit is called a cumulative morphine milligram equivalent (MME), and is designed to monitor safe dosing levels of opioids for individuals who may be taking more than 1 opioid drug for pain management. If your doctor prescribes more than this amount or thinks the limit is not right for your situation, you or your doctor can ask the plan to cover the additional quantity.
7D 7-day limit	An opioid drug used for the treatment of acute pain may be limited to a 7-day supply for members with no recent history of opioid use. This limit is intended to minimize long-term opioid use. For members who are new to the plan, and have a recent history of using opioids, the limit may be overridden by having the pharmacy contact the plan.
DL Dispensing limit	Dispensing limits apply to this drug. This drug is limited to a 1-month supply per prescription.

Medicare Advantage Plans (Part C) and Cost Plans

Medicare Health Maintenance Organization (HMO) Plan — A Medicare Advantage Plan that provides all Original Medicare Part A and Part B health coverage and sometimes covers Part D prescription drug coverage. In most HMOs, you can only get your care from doctors or hospitals in the plan's network (except in emergencies).

Medicare HMO Point-of-Service (HMO-POS) Plan — A Medicare Advantage Plan that provides all Original Medicare Part A and Part B health coverage and sometimes covers Part D prescription drug coverage. HMO-POS plans may allow you to get some services out of network for a higher copayment or coinsurance.

Medicare Preferred Provider Organization (PPO) Plan — A Medicare Advantage Plan that provides all Original Medicare Part A and Part B health coverage and sometimes covers Part D prescription drug coverage. PPOs have network doctors, providers and hospitals but you can also use out-of-network providers, usually at a higher cost.

Medicare Private Fee-For-Service (PFFS) Plan — A Medicare Advantage Plan in which you may go to any Medicare-approved doctor, hospital and provider that accepts the plan's payment, terms and conditions and agrees to treat you — not all providers will. If you join a PFFS Plan that has a network, you can see any of the network providers who have agreed to always treat plan members. You will usually pay more to see out-of-network providers.

Medicare Special Needs Plan (SNP) — A Medicare Advantage Plan that has a benefit package designed for people with special health care needs. Examples of the specific groups served include people who have both Medicare and Medicaid, people who reside in nursing homes, and people who have certain chronic medical conditions.

Medicare Medical Savings Account (MSA) Plan — MSA Plans combine a high deductible health plan with a bank account. The plan deposits money from Medicare into the account. You can use it to pay your medical expenses until your deductible is met.

Medicare Cost Plan — In a Medicare Cost Plan, you can go to providers both in and out of network. If you get services outside of the plan's network, your Medicare-covered services will be paid for under Original Medicare but you will be responsible for Medicare coinsurance and deductibles.

Stand-alone Medicare Prescription Drug (Part D) Plan
